BRAND KIT

TransPerfect + Client

The co-brand system governs how TransPerfect appears alongside a named client or strategic partner. It preserves the master identity while allowing the client mark equal weight in the lockup. Keep pops muted; the client brand color should be the loudest element on the page.

02 Logos & usage

TransPerfect + Client lockup follows the master rules

TransPerfect + Client uses the TransPerfect wordmark with a division line beneath it. All master logo rules apply — clear space, color use, no distortion. The division line is always secondary in weight to the wordmark.

03 Colour & accessibility

Accent colours are for fills, never for text

Body and heading text is Blue 800 #03002C on light, or white on Blue 500 #003FC7 and darker.

Aqua #A1FBF9, Lavender #C2A3FF and every tertiary pop fail WCAG AA as text on white — use them as fills, rules, bars and icon shapes only.

White on Blue 500 #003FC7 clears AA at all sizes; white on Blue 800 #03002C clears AAA.

Dark Gray #666 is the lightest grey allowed for small text on white; never use it on a tinted surface.

Colour is never the only signal — pair status colour with a label, icon or position.

04 Typography

One Geist Sans scale across every surface. Headings run tight (-4 to 0 tracking, 100-120% leading) and drop weight as they shrink; body copy always keeps 140% leading for readability at length. Verdana is the fallback on web and in email where Geist cannot load. Never introduce a second display face, and never set a heading below 18px — use body styles instead.

Primary	Geist Sans. Web: Verdana.

05 Photography & visual direction

Shared workspaces, joint teams, on-site partnerships. Keep imagery neutral so the client brand can lead.

Balanced lockups, side-by-side layouts, restrained backgrounds. Do not let TransPerfect accents overpower the client brand.

Do and don't

DO
Shoot real people at work — collaboration, conversation, hands on screens.

DO
Keep lighting soft and directional; shallow depth of field on the subject.

DO
Leave open space on one side so a headline or lockup can sit clear of faces.

DO

Blend imagery into brand colour with the soft-transition gradient wash.

DON'T

No stock cliches — handshakes, globes, floating binary, staged boardrooms.

DON'T

Never recolour skin tones or push saturation to match an accent.

DON'T

Never set body copy straight onto a busy area of a photo; use a scrim.

DON'T

Never place the logo over a complex part of the image.

06 Iconography

Hero Icons — soft, rounded, human

We use Hero Icons as the foundation of our icon system: a clean, open-source library aligned with modern UI standards. Small adjustments reflect TransPerfect's visual language. Icons serve both function and brand — they guide the eye, provide quick visual context and bring balance to text-heavy layouts. Their soft, rounded shapes complement the brand visuals, remaining clear at small sizes while expressing a friendly, human tone. Download the approved icon bank on Basecamp and re-download regularly as new icons are added.

Co-brand Uses

Joint program · Managed service · Strategic partnership · Named account

Facebook, LinkedIn & X

An all-white logo is preferred.

Never use a full-color logo on an image.

Use an all-black or all-navy logo on a light photo for visibility.

A side-by-side logo lockup is preferred.

Keep the logo in the bottom-right corner.

Instagram

Do not watermark Instagram images — watermarks feel redundant and disingenuous to the platform.

Strive for authentic, behind-the-scenes-style interactions with followers.

Let imagery lead; brand shows through tone, color and composition rather than a logo overlay.
