BRAND KIT

TransPerfect Life Sciences

TransPerfect Life Sciences supports pharma, medtech and clinical research with regulated content services — from eCTD submissions to patient-facing recruitment. The tone is measured, evidence-led and precise; the visual system favors calm neutrals with occasional Green pops that signal accuracy and forward motion.

ALWAYS

- Use approved colors only. White on dark, black on bright. No off-brand color fills.
- Keep clear space (1.5H). H = height of the T. No other elements inside that zone.
- Real clinical settings: coordinators, monitors, sites, patient-facing screens.
- Human-first framing — a person in the frame, warmly lit, never anonymous.

NEVER

- Never resize or reorder elements. Wordmark and symbol proportions are fixed.
- Never rotate, skew or distort. Always upright and unstretched.
- Never add effects or keylines. No shadow, glow, stroke, gradient overlays.
- Never flip. Mirror image is not permitted.

READING THIS DOCUMENT

Outlined pills are live download links. Contrast badges use WCAG 2.x. "Proof first" values need a printer proof before production.

01 Identity & positioning

Life Sciences Division · Brand Guidelines

Global content for every trial, submission and patient.

TransPerfect Life Sciences supports pharma, medtech and clinical research with regulated content services — from eCTD submissions to patient-facing recruitment. The tone is measured, evidence-led and precise; the visual system favors calm neutrals with occasional Green pops that signal accuracy and forward motion.

Accuracy first	A number is checked to source before it ships.
Traceable	Every claim, translation and approval can be evidenced.
Patient-centred	Plain language wherever a patient will read it.
Compliant by default	The regulated path is the easy path.
Measured tone	Confident, never promotional, about clinical outcomes.

02 Logos & usage

TransPerfect Life Sciences lockup follows the master rules

TransPerfect Life Sciences uses the TransPerfect wordmark with a division line beneath it. All master logo rules apply — clear space, color use, no distortion. The division line is always secondary in weight to the wordmark.

Do and don't

DO
Use approved colors only. White on dark, black on bright. No off-brand color fills.

DO
Keep clear space (1.5H). H = height of the T. No other elements inside that zone.

DON'T
Never resize or reorder elements. Wordmark and symbol proportions are fixed.

DON'T
Never rotate, skew or distort. Always upright and unstretched.

DON'T
Never add effects or keylines. No shadow, glow, stroke, gradient overlays.

DON'T
Never flip. Mirror image is not permitted.

DON'T
Never change the typeface. The wordmark is a fixed lockup.

DON'T
Never place over complex backgrounds. Use solid/quiet surfaces; over imagery add a wash.

03 Colour & accessibility

Regulated copy stays high contrast

Submission, safety and consent copy is Blue 800 #03002C on white or white on Blue 800 — no tinted

grounds behind it.

Green #A6FA87 marks accuracy and completion as a fill only; it never sets text and never stands alone as a compliance signal.

Small print — footnotes, references, regulatory lines — holds at least 4.5:1 and never sits at Dark Gray on a tint.

Print body text is 100K black, never a four-colour build.

05 Photography & visual direction

Clinical settings, patient-facing hands and screens, lab environments — always human-first, never sterile stock. Use soft-transition washes over imagery to keep tone warm.

Calm gradients, subtle grid infographics, timeline visuals for submission journeys. Green appears sparingly as a signal of accuracy or approval.

Do and don't

DO
Real clinical settings: coordinators, monitors, sites, patient-facing screens.

DO
Human-first framing — a person in the frame, warmly lit, never anonymous.

DO
Keep consent and privacy in mind: no identifiable patient records on screen.

DON'T
No sterile empty labs or gloved hands holding a vial as the only subject.

DON'T
Never imply a clinical outcome the copy cannot support.

DON'T
Never use Green as a badge that reads as regulatory approval.

06 Iconography

Hero Icons — soft, rounded, human

We use Hero Icons as the foundation of our icon system: a clean, open-source library aligned with modern UI standards. Small adjustments reflect TransPerfect's visual language. Icons serve both function and brand — they guide the eye, provide quick visual context and bring balance to text-heavy layouts. Their soft, rounded shapes complement the brand visuals, remaining clear at small sizes while expressing a friendly, human tone. Download the approved icon bank on Basecamp and re-download regularly as new icons are added.

07 Applications & brand family

Life Sciences Practice

Life Sciences · LMK Clinical Research Consulting · Medical Device · Trial Interactive

Facebook, LinkedIn & X

An all-white logo is preferred.

Never use a full-color logo on an image.

Use an all-black or all-navy logo on a light photo for visibility.

A side-by-side logo lockup is preferred.

Keep the logo in the bottom-right corner.

Instagram

Do not watermark Instagram images — watermarks feel redundant and disingenuous to the platform.

Strive for authentic, behind-the-scenes-style interactions with followers.

Let imagery lead; brand shows through tone, color and composition rather than a logo overlay.
