ALWAYS

- Use approved colors only. White on dark, black on bright. No off-brand color fills.
- Keep clear space (1.5H). H = height of the T. No other elements inside that zone.
- Shoot real people at work — collaboration, conversation, hands on screens.
- Keep lighting soft and directional; shallow depth of field on the subject.

NEVER

- Never resize or reorder elements. Wordmark and symbol proportions are fixed.
- Never rotate, skew or distort. Always upright and unstretched.
- Never add effects or keylines. No shadow, glow, stroke, gradient overlays.
- Never flip. Mirror image is not permitted.

02 Logos & usage

Wordmark and symbol are treated independently

The logo has two elements: the wordmark (typographic) and the symbol (the T). In digital contexts they appear separately depending on format and function. The symbol comes in square and circular versions so it never crops at the edges as an icon or favicon. Clear space around the wordmark = 1.5× the height of the T.

Do and don't

DO
Use approved colors only. White on dark, black on bright. No off-brand color fills.

DO
Keep clear space (1.5H). H = height of the T. No other elements inside that zone.

DON'T
Never resize or reorder elements. Wordmark and symbol proportions are fixed.

DON'T

Never rotate, skew or distort. Always upright and unstretched.

DON'T

Never add effects or keylines. No shadow, glow, stroke, gradient overlays.

DON'T

Never flip. Mirror image is not permitted.

DON'T

Never change the typeface. The wordmark is a fixed lockup.

DON'T

Never place over complex backgrounds. Use solid/quiet surfaces; over imagery add a wash.

03 Colour & accessibility

Accent colours are for fills, never for text

Body and heading text is Blue 800 #03002C on light, or white on Blue 500 #003FC7 and darker.

Aqua #A1FBF9, Lavender #C2A3FF and every tertiary pop fail WCAG AA as text on white — use them as fills, rules, bars and icon shapes only.

White on Blue 500 #003FC7 clears AA at all sizes; white on Blue 800 #03002C clears AAA.

Dark Gray #666 is the lightest grey allowed for small text on white; never use it on a tinted surface.

Colour is never the only signal — pair status colour with a label, icon or position.

04 Typography

One Geist Sans scale across every surface. Headings run tight (-4 to 0 tracking, 100-120% leading) and drop weight as they shrink; body copy always keeps 140% leading for readability at length. Verdana is the fallback on web and in email where Geist cannot load. Never introduce a second display face, and never set a heading below 18px — use body styles instead.

Primary	Geist Sans. Web: Verdana.

05 Photography & visual direction

Photography captures the human side of transformation — professional, collaborative settings with soft lighting and shallow depth of field. Use a soft-transition treatment (blurred gradient wash) to blend imagery with brand color.

Brand visuals translate transformation into abstract form — glowing spheres, vertical light gradients, ambient blue/purple washes. Use as hero compositions, section dividers or subtle ambient gradients.

Do and don't

DO
Shoot real people at work — collaboration, conversation, hands on screens.

DO
Keep lighting soft and directional; shallow depth of field on the subject.

DO
Leave open space on one side so a headline or lockup can sit clear of faces.

DO
Blend imagery into brand colour with the soft-transition gradient wash.

DON'T
No stock cliches — handshakes, globes, floating binary, staged boardrooms.

DON'T
Never recolour skin tones or push saturation to match an accent.

DON'T
Never set body copy straight onto a busy area of a photo; use a scrim.

DON'T
Never place the logo over a complex part of the image.

06 Iconography

Hero Icons — soft, rounded, human

We use Hero Icons as the foundation of our icon system: a clean, open-source library aligned with modern UI standards. Small adjustments reflect TransPerfect's visual language. Icons serve both function and

brand — they guide the eye, provide quick visual context and bring balance to text-heavy layouts. Their soft, rounded shapes complement the brand visuals, remaining clear at small sizes while expressing a friendly, human tone. Download the approved icon bank on Basecamp and re-download regularly as new icons are added.

An all-white logo is preferred.

Never use a full-color logo on an image.

Use an all-black or all-navy logo on a light photo for visibility.

A side-by-side logo lockup is preferred.

Keep the logo in the bottom-right corner.

Instagram

Do not watermark Instagram images — watermarks feel redundant and disingenuous to the platform.

Strive for authentic, behind-the-scenes-style interactions with followers.

Let imagery lead; brand shows through tone, color and composition rather than a logo overlay.
