ALWAYS

- Use approved colors only. White on dark, black on bright. No off-brand color fills.
- Keep clear space (1.5H). H = height of the T. No other elements inside that zone.
- Shoot real people at work — collaboration, conversation, hands on screens.
- Keep lighting soft and directional; shallow depth of field on the subject.

NEVER

- Never resize or reorder elements. Wordmark and symbol proportions are fixed.
- Never rotate, skew or distort. Always upright and unstretched.
- Never add effects or keylines. No shadow, glow, stroke, gradient overlays.
- Never flip. Mirror image is not permitted.

02 Logos & usage

TransPerfect Digital lockup follows the master rules

TransPerfect Digital uses the TransPerfect wordmark with a division line beneath it. All master logo rules apply — clear space, color use, no distortion. The division line is always secondary in weight to the wordmark.

Clear space

RULE

Clear space is 1.5× the height of the T symbol (x) on every side. Keep text, edges and other marks outside it.

x = height of the T symbol at the size used. Dashed outer line = minimum clear space; inner line = logo bounds. Diagram is to proportion, not to print scale.

Usage rules · do / don't

DO

Use approved colors only. White on dark, black on bright. No off-brand color fills.

DO

Keep clear space (1.5H). H = height of the T. No other elements inside that zone.

DON'T

Never resize or reorder elements. Wordmark and symbol proportions are fixed.

DON'T

Never rotate, skew or distort. Always upright and unstretched.

DON'T

Never add effects or keylines. No shadow, glow, stroke, gradient overlays.

DON'T

Never flip. Mirror image is not permitted.

DON'T

Never change the typeface. The wordmark is a fixed lockup.

DON'T

Never place over complex backgrounds. Use solid/quiet surfaces; over imagery add a wash.

03 Colour & accessibility

Accent colours are for fills, never for text

Body and heading text is Blue 800 #03002C on light, or white on Blue 500 #003FC7 and darker.

Aqua #A1FBF9, Lavender #C2A3FF and every tertiary pop fail WCAG AA as text on white — use them as fills, rules, bars and icon shapes only.

White on Blue 500 #003FC7 clears AA at all sizes; white on Blue 800 #03002C clears AAA.

Dark Gray #666 is the lightest grey allowed for small text on white; never use it on a tinted surface.

Colour is never the only signal — pair status colour with a label, icon or position.

Contrast is WCAG 2.x for text in this colour on white / ink. AA = 4.5:1 body text; AA large = 3:1 for 18pt+ or bold 14pt+.

Colour balance

Illustrative proportion for a typical layout: lead colour dominant, neutrals for space, secondary accents kept to about 10%.

04 Typography

One Geist Sans scale across every surface. Headings run tight (-4 to 0 tracking, 100-120% leading) and drop weight as they shrink; body copy always keeps 140% leading for readability at length. Verdana is the fallback on web and in email where Geist cannot load. Never introduce a second display face, and never set a heading below 18px — use body styles instead.

Primary
Geist Sans. Web: Verdana.

05 Photography & visual direction

E-commerce and retail settings, hands on devices, campaign photography with warm secondary tones. Keep imagery bright and human — this division sells experience, not infrastructure.

Before/after splits, metric callouts, campaign moodboards. Peach and Yellow appear as accents around numbers and KPIs.

Usage rules · do / don't

DO
Shoot real people at work — collaboration, conversation, hands on screens.

DON'T
No stock cliches — handshakes, globes, floating binary, staged boardrooms.

DO
Keep lighting soft and directional; shallow depth of field on the subject.

DON'T
Never recolour skin tones or push saturation to match an accent.

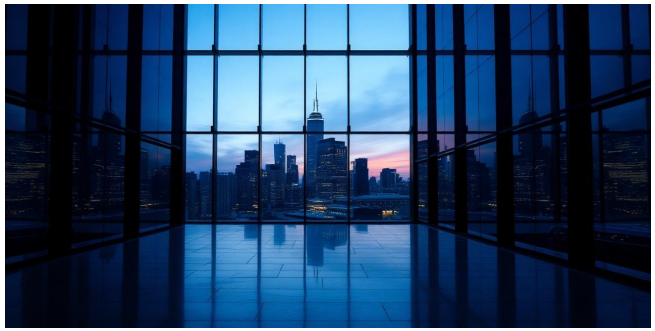

DO
Leave open space on one side so a headline or lockup can sit clear of faces.

DON'T
Never set body copy straight onto a busy area of a photo; use a scrim.

DO
Blend imagery into brand colour with the soft-transition gradient wash.

DON'T
Never place the logo over a complex part of the image.

06 Iconography

Hero Icons — soft, rounded, human

We use Hero Icons as the foundation of our icon system: a clean, open-source library aligned with modern UI standards. Small adjustments reflect TransPerfect's visual language. Icons serve both function and brand — they guide the eye, provide quick visual context and bring balance to text-heavy layouts. Their soft, rounded shapes complement the brand visuals, remaining clear at small sizes while expressing a friendly, human tone. Download the approved icon bank on Basecamp and re-download regularly as new icons are added.

07 Applications & brand family

Digital & Agency

TransPerfect Digital

Facebook, LinkedIn & X

An all-white logo is preferred.

Never use a full-color logo on an image.

Use an all-black or all-navy logo on a light photo for visibility.

A side-by-side logo lockup is preferred.

Keep the logo in the bottom-right corner.

Instagram

Do not watermark Instagram images — watermarks feel redundant and disingenuous to the platform.

Strive for authentic, behind-the-scenes-style interactions with followers.

Let imagery lead; brand shows through tone, color and composition rather than a logo overlay.
