# 02 Logos & usage

TransPerfect Media lockup follows the master rules

TransPerfect Media uses the TransPerfect wordmark with a division line beneath it. All master logo rules apply — clear space, color use, no distortion. The division line is always secondary in weight to the wordmark.

## Clear space

RULE

**Clear space is 1.5× the height of the T symbol (x) on every side. Keep text, edges and other marks outside it.**

x = height of the T symbol at the size used. Dashed outer line = minimum clear space; inner line = logo bounds. Diagram is to proportion, not to print scale.

## Usage rules · do / don't

# 03 Colour & accessibility

Accent colours are for fills, never for text

Body and heading text is Blue 800 #03002C on light, or white on Blue 500 #003FC7 and darker.

Aqua #A1FBF9, Lavender #C2A3FF and every tertiary pop fail WCAG AA as text on white — use them as fills, rules, bars and icon shapes only.

White on Blue 500 #003FC7 clears AA at all sizes; white on Blue 800 #03002C clears AAA.

Dark Gray #666 is the lightest grey allowed for small text on white; never use it on a tinted surface.

Colour is never the only signal — pair status colour with a label, icon or position.

## Colour balance

Illustrative proportion for a typical layout: lead colour dominant, neutrals for space, secondary accents kept to about 10%.

# 04 Typography

One Geist Sans scale across every surface. Headings run tight (-4 to 0 tracking, 100-120% leading) and drop weight as they shrink; body copy always keeps 140% leading for readability at length. Verdana is the fallback on web and in email where Geist cannot load. Never introduce a second display face, and never set a heading below 18px — use body styles instead.

## 05 Photography & visual direction

Full-bleed media, editorial spreads, poster-scale type. Pink appears as a signature accent — never as a bulk background.

| | |
|---|---|
| **Cinematic stills** | studios, dubbing booths, mixing desks, screens in low light. Prefer high-contrast frames with Pink or Lavender ambient wash rather than saturated real-world color. |

## Usage rules · do / don't

**DO**
Shoot real people at work — collaboration, conversation, hands on screens.

**DON'T**
No stock cliches — handshakes, globes, floating binary, staged boardrooms.

**DO**
Keep lighting soft and directional; shallow depth of field on the subject.

**DON'T**
Never recolour skin tones or push saturation to match an accent.

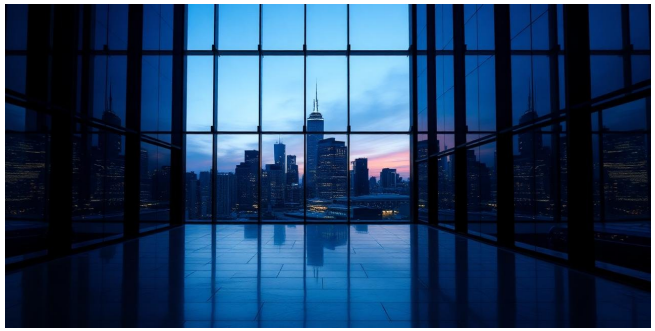

**DO**
Leave open space on one side so a headline or lockup can sit clear of faces.

**DON'T**
Never set body copy straight onto a busy area of a photo; use a scrim.

**DO**
Blend imagery into brand colour with the soft-transition gradient wash.

**DON'T**
Never place the logo over a complex part of the image.

# 06 Iconography

Hero Icons — soft, rounded, human

We use Hero Icons as the foundation of our icon system: a clean, open-source library aligned with modern UI standards. Small adjustments reflect TransPerfect's visual language. Icons serve both function and brand — they guide the eye, provide quick visual context and bring balance to text-heavy layouts. Their soft, rounded shapes complement the brand visuals, remaining clear at small sizes while expressing a friendly, human tone. Download the approved icon bank on Basecamp and re-download regularly as new icons are added.

Media Technologies

Creator · Media Inspector · Media Conductor · Media Director · TransPerfect TV

Facebook, LinkedIn & X

An all-white logo is preferred.

Never use a full-color logo on an image.

Use an all-black or all-navy logo on a light photo for visibility.

A side-by-side logo lockup is preferred.

Keep the logo in the bottom-right corner.

Instagram

Do not watermark Instagram images — watermarks feel redundant and disingenuous to the platform.

Strive for authentic, behind-the-scenes-style interactions with followers.

Let imagery lead; brand shows through tone, color and composition rather than a logo overlay.
